

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A thermal transfer sheet comprising:
a base material sheet; and
a transparent transfer layer provided separably on the base material sheet, wherein
a hologram layer is provided on at least a part of the transparent transfer layer.
2. (Original) The thermal transfer sheet according to claim 1, wherein said
transparent transfer layer comprises a laminate of an intermediate transfer medium and a hologram
transfer layer, said intermediate transfer medium comprising a protective layer, said hologram
transfer layer comprising a hologram layer.
3. (Original) The thermal transfer sheet according to claim 2, wherein said
transparent transfer layer has been formed by stacking said hologram transfer layer comprising a
hologram layer onto the intermediate transfer medium comprising a protective layer by a thermal
transfer method.
4. (Original) The thermal transfer sheet according to claim 2, comprising said
hologram transfer layer comprising a hologram layer stacked onto the intermediate transfer
medium comprising a protective layer through a self-adhesive layer.
5. (Original) The thermal transfer sheet according to claim 2, comprising said
hologram transfer layer comprising a hologram layer stacked onto the intermediate transfer
medium comprising a protective layer through a pressure-sensitive adhesive layer.
6. (Currently Amended) A thermal transfer sheet according to ~~any one of claims~~claim
~~1 to 5~~, wherein said hologram transfer layer is in a pattern form.

7. (Original) A process for producing a thermal transfer sheet according to claim 3, characterized by comprising stacking a hologram transfer layer comprising a hologram layer onto an intermediate transfer medium comprising a protective layer provided on a base material sheet by a thermal transfer method.

8. (Original) A process for producing a thermal transfer sheet according to claim 4, characterized by comprising stacking, through an adhesive layer, a hologram transfer layer comprising a volume hologram layer onto an intermediate transfer medium comprising a protective layer provided on a base material sheet.

9. (Original) A process for producing a thermal transfer sheet according to claim 5, characterized by comprising stacking, through a pressure sensitive adhesive layer, a hologram transfer layer comprising a hologram layer onto an intermediate transfer medium comprising a protective layer provided on a base material sheet.

10. (Currently Amended) The thermal transfer sheet according to ~~any one of~~ claim 1 to 5, wherein said intermediate transfer medium can absorb ultraviolet light.

11. (Currently Amended) An image formed object, characterized by being produced by the transfer of a thermal transfer sheet according to ~~any one of claims~~ claim 1 to 5.
